Version 1.1

# Introduction

---

Rebel Traders is designed as safe space to openly discuss projects, get and give honest and constructive feedback, and ask the hard questions to ensure we know what we are investing in. We LOVE our community and believe that GREAT PEOPLE are at the HEART of every successful venture!

Join us on telegram : <https://t.me/rebeltraders>

We also love diversifying our portfolios! Rebel Traders realized that most Telegram channels possess a ‘maxi’ mentality and some do not even like discussing negative aspects of the project, shutting it down as ‘FUD’. We seek to be different. Come enjoy a solid and legitimate community of investors who will help share different perspectives and make better investment decisions, together!

## What We Do

---

Rebel Traders hosts AMA’s and serves as a resource for new and established projects, bringing a healthy community of investors to the table. We are part of a network of trustworthy, reliable projects and individuals in the crypto-sphere that will provide excellent exposure to solid investment opportunities.

# Tokenomics

## Revenue

---

All AMA Revenues: Buyback & Burn

Profits from Rebel Traders Community managed wallet :

~ 50% Rebel buyback and burn

~ 50% community vote

(Burn/BNB rewards/Reinvest)

## Use case

---

Our use case is UNIQUE - Rebel Traders Group revenue and profits are used to buyback and burn Rebel Traders Token - constantly increasing the value of your investment! This is the PUREST form of hyper deflationary - using revenue, not just taxes, to burn the token! We will NOT stop the burn which means revenue will ALWAYS continue to boost the price and lower the supply !
